Night of Museums in the Golden Eagle Pharmacy Museum

In our charming building we are waiting for you with exciting guided tours on the 24th of June, the Night of Museums. The veils of alchemist workshops is falling! Medieval mysterious scholars, magical practices: 18 and 8 p.m., Alchemy and the History of Pharmacy
Our librarian-museologist Jancsikity Erzsébet will give a guided tour.

Mystical decoctions, occult schools and gold makers: Night of Museums in the Golden Eagle Pharmacy Museum!

The Golden Eagle Pharmacy Museum can be visited at the Night of Museums until midnight.

MUSEUM PEDAGOGY

EDIBLE HERBS (8-18 ESTER)

During our museum pedagogical workshop, we present the edible herbs available in Hungary in the Arany Eagle Pharmacy Museum. In our interactive workshops, both young and old can learn about the healing effect and use of plants. During the session, students can get acquainted with the history of the Golden Eagle Pharmacy Museum and the pharmacy.

Age range: 8-18

Location of the program: Arany Sas Pharmacy Museum , 1014 Budapest, Tárnok u. 18.

Contact:

Semmelweis Museum of Medical History, Library and Archives

1013 Budapest, Apród u. 1-3.

Tel: +36-1-20 11 577 +36-1-375-3533

THE WAY OF LIFE. THE HISTORY OF BIRTH AND BIRTH THROUGH PERIODS (14-18 ÉV)

Our profession presents the history of obstetrics across the ages: how did medicine slowly learn about the process of childbirth together with the human body, what was the situation of women expecting and giving birth in recent ages, and what were their opportunities? How did Ignác Semmelweis realize that the best antidote to maternal fever is hand washing, and what was the role of Vilmos Tauffer in the first successful caesarean sections? The main activities detailing the breakthroughs of the 18th and 20th centuries, including group work and source analysis, are recommended for students interested in biology and history.

WHAT IS THE WAY? FASHION AND HEALTH

Although it can be astonishing at first, fashion and health care often go hand in hand. The illnesses and health of our ancestors and their image of the functioning of the human body have fundamentally influenced fashion over the centuries. In our program across the ages, we get acquainted with the inherent causes and dangers of wearing a long skirt, corset and gloves!

Recommended age group: 9 to 99 years

The National Pharmacy Day will be held for the 13th time organized by the Hungarian Chamber of Pharmacists, organized by Galenus Kft. This time the Golden Eagle Pharmacy Museum will also join this national program. On June 1, 2016, at 4 p.m., we are waiting for the visitors with the thematic guided tour of Harry Potter and the History of Pharmacy.

We try to answer the question of how the cultural traditions and the historical background of science have worked J.K. Rowling for Harry Potter and the Philosopher's Stone. What were the special ingredients that were used in the old pharmacies for the preparation of medicine and included in the novel. We'll show you what a real zoar is.

During the thematic guided tour, it is revealed what alchemy played in the development of chemistry, and how all this influenced the novel text. The permanent exhibition of the Golden Eagle Pharmacy Museum presents the basic chemical operations and laboratory tools. Visitors can exceptionally enter the so-called alchemist workshop, which could even be the place of Professor Snape's potion.

We are looking forward to this intercultural and interdisciplinary time travel!

Registration: Dr. Erzsébet Jancsikity chief museologist at jancsikity220@gmail.com.

MUSEUM PEDAGOGY

SUSTAINABILITY IN THE SERVICE OF HEALTH

Sustainability and eco-consciousness are becoming more and more important in our modern, technologically dominated society. The gift of our museum is that through its material and intellectual collection you can present useful techniques and dishes that can be learned from our ancestors. On our profession, young people can get acquainted with habits that can be continued today, which they can also transfer to health-conscious everyday life themselves.

Herbal workshops - 2025

Herbs and herbal preparations are renaissance. Until the 19th century, the composition of medicines and medicinal products was made up of plant and animal raw materials. The knowledge gained through experiential purposes was also justified by modern science. The herbs help our healing and support our body with their active ingredients, with due justification and the right methods.

This spring and early summer we will hold 3 workshops on this topic.

We start our workshops in our Witch's Kitchen, where you can suck the scent of the half a hundred dried plants collected in the area of the museum, take a little taste of the tea of one of the plants and see the seasonal plants growing along the barns. Then we walk through our pharmacy in Transylvania's region at the beginning of the century, and we continue the program in the Experience Lab, in the world of herbs.
